

Buckhorn™ Reusable Intermediate Bulk Containers

BUCKHORN™ REUSABLE INTERMEDIATE BULK CONTAINERS

Maximum Protection, Hygiene and Efficiency in Handling Bulk Liquids

Buckhorn reusable intermediate bulk containers from ILC Dover are designed to provide maximum product protection, hygiene and efficiency.

PRODUCT PROTECTION

The high pressure injection molded Buckhorn intermediate bulk container made from FDA approved and 100% recyclable materials provides a safe and secure reusable package. These strong and durable containers can be stacked up to 5 high when fully loaded. The high density polyethylene construction withstands the effects of sun, wind, rain, ice or snow and allows for long-term outdoor storage. The Guardian liner that is designed for use with the container provides the ultimate product protection and is available in many different configurations depending on your unique application.

HYGIENE

The smooth interior and exterior surfaces reduce the opportunities for product contamination and allow for easy container cleaning. Constructed of FDA approved materials, the container is safe for use in environments that employ the strictest hygienic standards. Tamper-evident seals can be placed on the top lid and on the dispense opening. Guardian liners are manufactured in an ultra clean environment and are available irradiated should your process require a completely sterile container.

EFFICIENCY

The collapsible design of the Buckhorn container requires minimal storage space and can save on return transport costs compared to rigid IBCs. In a closed loop system, the cost per trip can be much less than that of other liquid handling systems.

Buckhorn™ Reusable Intermediate Bulk Containers

CALIBER 315 SPECIFICATIONS

- Color: Tan
- Weight: 225 lbs.
- Container Capacity: 315 gallons / 3,300 lbs.
- Dimensions: L 48.6" X W 44.7" X H 48"
- Truck Capacity: 48-56 assembled containers (filled)
120-168 collapsed containers (empty)
- Easy to clean
- Made from FDA approved materials
- 100% recyclable
- Stackable and fold-able
- RFID and other identification options available.
- Can withstand temperature extremes
- AAR certified for rail shipping
- Tamper-Evident features
- Utilizes Guardian liners

COLLAPSIBLE DESIGN
REQUIRES MINIMAL
STORAGE SPACE
